

Product data sheet

Gyproc® FireStrip

Gyproc FireStrip is a soft extruded intumescent gap sealer.

Where to use

Use it to maintain fire resistance located between the soffit and the partition when forming a deflection head.

Product information

Composition

This product is a self-adhesive butyl extruded intumescent gap sealer.

Colour

Grey.

DIMENSIONS AND WEIGHTS

Lengths available (mm)	3600
Width (mm)	25
Nominal thickness (mm)	3
Length tolerance: maximum (mm)	+0.5
Length tolerance: minimum (mm)	0

Installation guidance

Cutting

Single lengths can be made by running a sharp blade between the strips while it is still on the reel.

Application

Preparation

All surfaces must be sound, clean, dry and free from oil, grease, dust and other loose material.

Application

Unreel the Gyproc FireStrip and place the exposed side on to the required surface. Press down firmly along the length to achieve good contact with the surface.

Once the strip is secured in place it can be cut to length using a sharp knife.

When ready to apply to the structural soffit, remove the backing liner and install into position.
