

## Product Data Sheet

# Knauf Windliner Tape

**Knauf Windliner Tape is a specialist tape with solvent free modified acrylic dispersion adhesive. It is designed for sealing joints and edges on the Knauf Windliner sheathing boards.**

### Areas of Application

Single-sided adhesive tape for exterior use, providing a high performing air and weather-tightness seal. Designed for sealing Knauf Windliner Sheathing boards.

### Compliance Standards

EN 1939, EN 1849-2, EN 1372:2015 & EN 1373:2015

### Key Benefits

- Quick and easy application
- Highly UV resistant
- Weather resistant
- Highly moisture resistant adhesive
- Excellent adhesive bond strength to Windliner Board substrates

### Performance Data

Reaction to Fire (R2F)	Bonding Strength (N/25mm)	UV Resistance
E	35 N/25 mm	6 months

### Technical information

Dimensions and Weights				
Width (mm)	Length (m)	Colour	Weight (gsm)	Material Number
60	25	Black	330	525459
100	25	Black	330	610524

## Storage and Handling

Store in shaded, dry conditions.

## Packaging

Boxes.

## Shelf Life

12 month-shelf life.

## Disposal/Repair

Disposal should be in accordance with local authority requirements.

## Health & Safety

Please refer to our Safety Data Sheet for guidance on Personal Protection Equipment required for the handling and installation of this product.

## Application / Installation

1. Surfaces must be dry and free of oil, grease, dust and other anti-adhesive components. Bonding to frozen surfaces is not possible.
2. Detach the release paper and affix the tape on the centre of the overlap of the two boards.
3. Gradually peel off the release paper and adhere the tape whilst keeping it tension-free and wrinkle-free to the substrate.
4. To consolidate the bond, apply firm pressure manually. Use of a seam roller will further improve the adhesion in most applications.

Exposed edges of cut to requirement boards are not required to be taped individually unless exposed to the elements. Taping is solely required for use to join the front face of the boards together or to relevant adjacent material to ensure water and weather tightness.
